› GitHub: github.com/adel145

Final-year Computer Science student focused on full-stack development, AI-powered applications, automation, and computer vision. Hands-on experience with React, TypeScript, Bun/Node, Express, MongoDB, Python, REST APIs, and applied ML concepts through academic, freelance, and product-based projects. Seeking junior roles in Full-Stack Development, AI Applications, Automation, Python Development, or Technical Integration.

Technical Skills

Languages: Python, JavaScript/TypeScript, SQL, Java, C++, C#, C

Frontend: React, Vite, Tailwind CSS, shadcn/ui, HTML5, CSS3

Backend: Node.js, Bun, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MongoDB Atlas, SQL, PostgreSQL/MySQL

AI / Data / ML: Pandas, NumPy, Scikit-learn, feature engineering, model evaluation, classification/regression basics, Computer Vision fundamentals

Automation / Tools: Git, GitHub, GitHub Actions, Postman, Linux CLI, n8n basics, API integrations

Core CS: Data Structures, Algorithms, OOP, Operating Systems, Databases, Networking, Software Engineering

Experience

2020 - 2022

■ Founder & CEO — SprintCity Courier

[SprintCity Courier, Israel](#)

- Founded and operated a local courier business, managing logistics, customer communication, workflows, and service quality.
- Built operational processes for route planning, task assignment, and delivery coordination.
- Managed hiring, training, daily operations, and business handover/exit.

2022 - Present

■ Freelance Software Developer

[worldwide](#)

- Built and customized web applications, e-commerce pages, and automation workflows using React, Node/Express, MongoDB, Shopify, and API integrations.
- Developed responsive user interfaces, REST API flows, and data-driven features for small business and academic projects.
- Improved Shopify product pages, metadata, SEO structure, and customer-facing UX for e-commerce use cases.
- Used Git, GitHub, Postman, and browser developer tools to debug, test, and maintain applications.

Featured Projects

Miktsoan — AI-Powered Service Matching Platform / Capstone

- React, TypeScript, Bun/Node, Express, MongoDB, JWT, OpenAI API, Python AI/CV components

- Building a full-stack platform that connects users with service professionals through problem reports, AI-assisted analysis, matching, leads, reviews, and admin workflows.
- Implemented authentication, category/professional flows, problem report handling, matching logic, media uploads, and dashboard features.
- Integrated AI-assisted text analysis to classify user problems and support professional recommendations.
- Developing AI/CV extensions as part of the project roadmap.

- Designed the system as a production-style academic capstone with frontend, backend, database, API routes, seed data, and demo users.

WaiterTip — Tip Prediction ML Project

- Python, Pandas, Scikit-learn
 - Built a machine learning project for predicting waiter tips from tabular data.
 - Practiced data cleaning, preprocessing, feature selection, model training, and model evaluation.
 - Planned improvements: documented metrics, baseline comparison, visualizations, and stronger project README.

3D Interactive Portfolio

- React, Three.js, Node.js
 - Developed an interactive portfolio website with React and 3D visual elements.
 - Focused on responsive layout, project presentation, and personal branding.

Crystallia — E-Commerce / Shopify Case Study

- Built and managed an online jewelry brand experience using Shopify, product-page optimization, SEO content, and e-commerce workflows.
- Gained practical experience in product structure, pricing, customer-facing UX, marketing content, and store operations.

Education

Oct 2022 - Jul 2026

- **B.Sc. Computer Science**
Sapir Academic College, Sderot, Israel

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Databases, Software Engineering, Computer Networks, Statistical Learning, Introduction to AI, Introduction to Machine Learning, Digital Image Processing, Practical Computer Vision, Generative AI Workshop, Numerical Methods, OOP in .NET/C#.

Courses

Sep 2023

- **JDV Java Developer**
CYDEO

Feb 2026

- **Build AI-Powered Apps**
Udemy

Mar 2026

- **Deep Learning Institute — Fundamentals of Accelerated Computing with CUDA Python**
NVIDIA

Present

- **Computer Vision and practical AI projects**
Udemy

Languages

- Hebrew
- English
- Arabic
